PARADIGMA

MAIN IDEA

PARADIGMA NFT METaverse is an NFT marketplace + Sci-fi + an innovative P2E gaming platform and forum that combines several directions, including the staking of all NFT characters through various missions. Paradigma is a totalizer with numerous quizzes, riddles, tasks, and solutions.

THE WORLD'S FIRST INTELLECTUAL NFT PLATFORM

The world's first intelligent NFT platform and forum that allows users to choose their own worldview about the shape of the Earth, Earth's laws, natural phenomena, and participate in unique missions related to a specific one of nine paradigms with like-minded players.

This is the world's first metaverse based on of diverse theories and debates. Immerse yourself in the amazing world of the meta-universe with Paradigma NFT.

In Paradigma NFT Metaverse, you can challenge any law or scientific proof and convince like-minded individuals of the correctness of your point of view. Only here can you place bets and win arguments with the majority of like-minded people. Here, you can own entire worlds with your unique characters, lands, and even exotic phenomena in the form of egregores and other forces.

As well as become participants of the world's first NFT forum.

PARADIGMA NFT METaverse breaks new ground in the world of NFT by offering a unique experience that no other crypto project currently offers.

THIS IS A UNIQUE OPPORTUNITY TO BECOME WHO YOU'VE ALWAYS DREAMED OF BEING IN THE REAL WORLD.

UNIQUE FEATURES

Intellectual NFT Platform: PARADIGMA NFT METaverse is the world's first intellectual NFT platform, offering participants the opportunity to showcase their skills and ingenuity.

On this platform, participants can demonstrate their mastery and knowledge while also earning cryptocurrency capital during the resolution of various disputes (Totalizer bets). The majority of like-minded individuals from one of the nine paradigms become the winners in these disputes.

This platform offers a unique opportunity for participants not only to showcase their intellectual abilities but also to earn cryptocurrency

NFT marketplace, stacking, farming, trading, totalizers & quizzes.

MEMBERSHIP IN SECRET SOCIETIES:

Only on Paradigma NFT Metaverse is it possible to become a member of any secret society, join various secret societies, orders, and conspiracies.

Participants can also take part in voting and elections of any format, place bets on the outcomes of elections and win based on the results, create their own totalizers, and attract participants for drawings.

THE NAME "PARADIGMA"

The project name "PARADIGMA" is not chosen randomly, A paradigm is a complex of scientific data and axioms that are accepted as reality and upon which a scientific, philosophical, or religious theory is developed. In simpler terms, a paradigm is the world of absolute truths that is beyond doubt for the scientific world. In Greek, "paradigma" translates to "example."

Our project will serve as an example for others, where the value of the project lies not in high marketplace commissions and percentages from NFT sales but in a unique concept and boundless opportunities for all platform users to showcase their creative and intellectual capabilities.

METaverse

The first step in opening our metaverse is a loyalty program for our community. If you've chosen our platform, it means you're not like everyone else, and you stand out from the crowd of people who think in a primitive way.

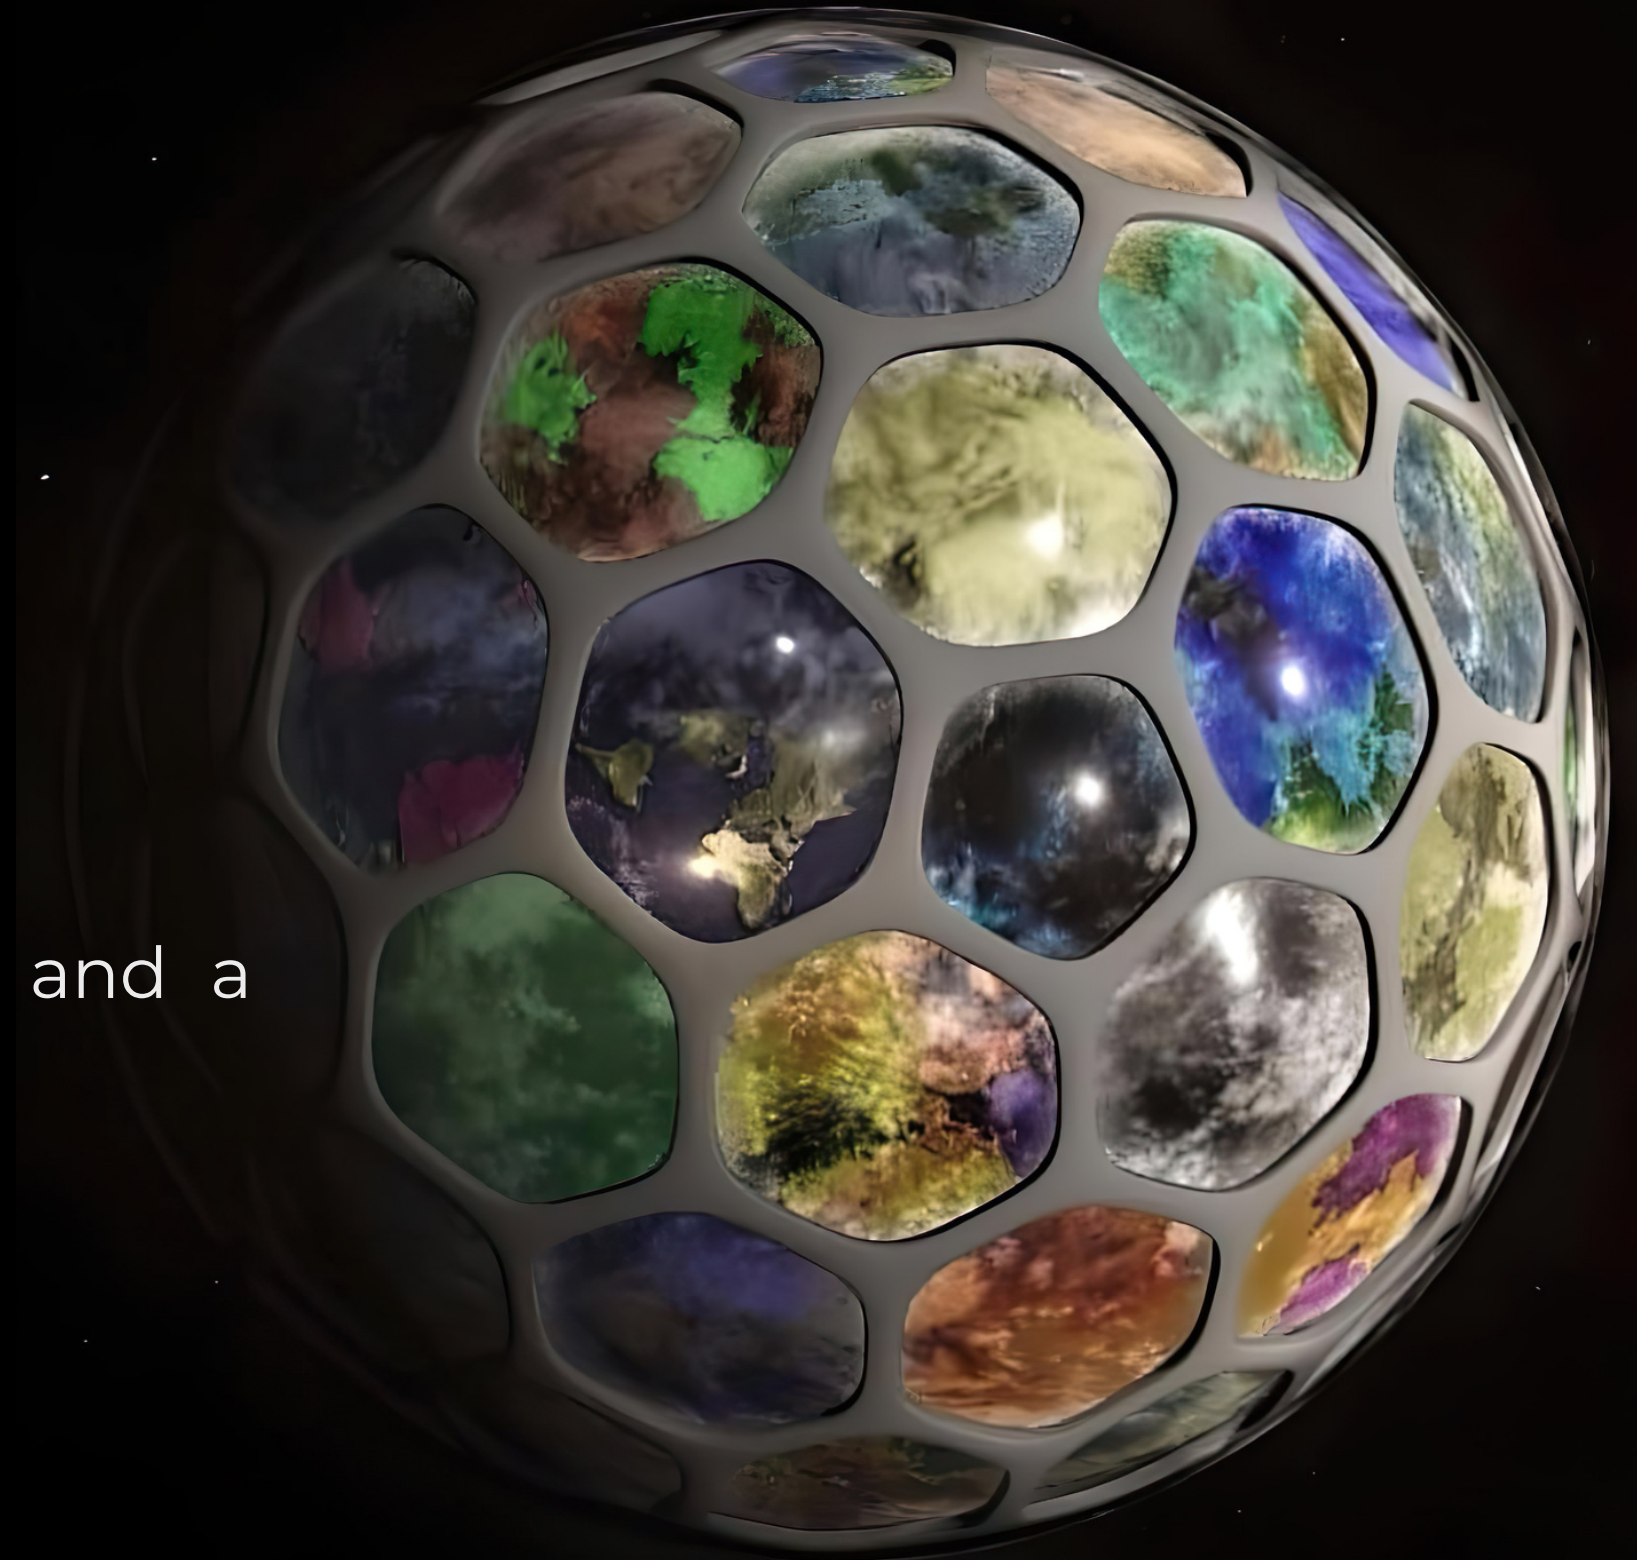

PARADIGMA

PARADIGMA is an extraordinary project where various worldviews are gathered. By choosing one, you automatically receive bonuses and priority over others.

The main goal of our platform is to give everyone the opportunity to choose and defend their point of view, prove it, and be rewarded, moving forward. The main concept is the worldview of each of you. As many people, as many opinions, and it's precisely on our platform that everyone's opinion will be taken into account.

IN OUR METAVERSION, THERE ARE 9 DIFFERENT PARADIGMS:

- 1. Earth is spherical.
- 2. The world is based on a flat Earth.
- 3. The world is a matrix.
- 4. Earth is a geoid.
- 5. Earth is hollow inside.
- 6. The world consists of cellular worlds.
- 7. The world is supported by three whales.
- 8. The world is upheld by three elephants and a turtle.
- 9. Quantum world.

EACH PARADIGM IS A SEPARATE PLATFORM

- PARADIGMA is an extraordinary project where various worldviews are gathered. By choosing one, you automatically receive bonuses and priority over others.
- Each paradigm becomes a separate platform with unique capabilities that align with the worldview and NFT selection.

An important concept of our project is the absence of a hierarchical management structure. Participants can set their own goals and strive to achieve them. In the PARADIGMA metaverse, there are no laws or prohibitions imposed by the global community. Each participant has equal opportunities and is not restricted by any prohibitions.

Each of our participants is a figure, not a mass, as in the real world. In our world, 10% of people are figures, while 90% are masses, many of whom are successful and talented but will never enter that 10% because they don't belong to a certain group or are not part of a specific scheme. What, if not a game, provides the opportunity to change it all?

What, if not a game, gives you the chance to achieve your dreams in the near future? You might wonder, where do NFTs fit in? It's precisely everything that exists in the real world that we offer to all of you in PARADIGMA NFT METaverse in the form of NFTs! From companies to resources, from devices to conglomerates that manufacture those devices! Everything that exists in the real world without limitations can be yours on our platform!

MARKETING AND AIRDROPS

In order to promote the Paradigma project, the team utilizes advertising campaigns, **bounties**, and **airdrops** to help grow and develop the community. As practice has shown, one of the best ways to incentivize participation in the project is through conducting airdrops using special promotion services, such as Gleam.io, where people receive project tokens as rewards for subscribing to the project's social media.

By choosing one of the 9 paradigms, participants form groups based on their interests, with each group participating in the first draw of the prize pool consisting of 1,000,000 PARAD tokens! The estimated token price after being listed on centralized exchanges as outlined in the project's roadmap will be \$0.01 cents, while on DEX platforms like PancakeSwap and Uniswap, the token price will be much lower at \$0.001 cents. The token PARAD will be listed on DEX exchanges by the end of this year.

 The winner of the first round will be the group that gathers the most supporters for their chosen paradigm (shape of the Earth). The entire prize will be divided among the three leading paradigms, based on the number of declared NFT images, which serve as the entry ticket to the Metaverse.

 Voting cycles will occur periodically every 9 days, with 1,000,000 PARAD coins up for grabs every nine days. This loyalty program will run for one year, and throughout the entire year, such drawings will be held 40 times!!! Participants from their paradigms will earn 40,000,000 tokens through these votes!!! However, as it turns out, that's not the most interesting part of the project.

But that's not the most interesting thing about the project itself. Each of the nine PARADIGMs is a future Play-to-Earn (P2E) gaming platform with its own characters, worlds, and rules.

These entire gaming ecosystems can be purchased in the form of NFT tokens that automatically generate profits because they are already integrated into the Proof-of-Stake system of their respective paradigm, consistently delivering profits! 💰

ERC777

PARAD TOKEN ON THE ERC777 STANDARD

The ERC-777 token standard is an improvement proposal over the ERC-20 standard, which is one of the most widely used standards for tokens on the Ethereum platform. Here are some key advantages of ERC-777 compared to ERC-20:

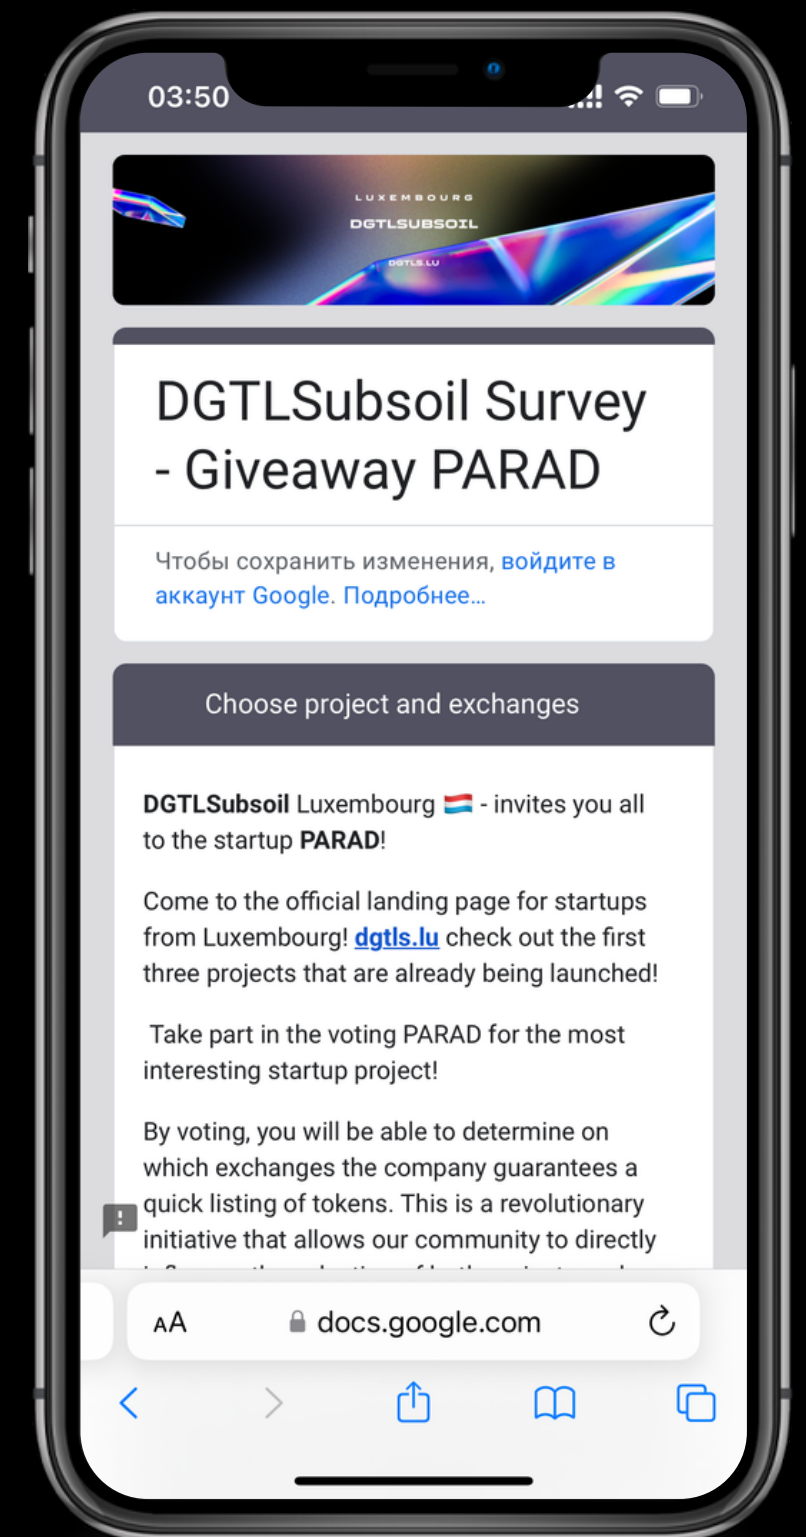

Advantages	Description
Secure Token Operations	ERC-777 incorporates additional security features that make token operations safer. In particular, it allows contracts to specify the receiving contract before token transfer, reducing the risk of token loss due to incorrectly specified recipient addresses.
More Flexible Functionality	ERC-777 includes additional methods that enable contracts to work with tokens more flexibly. For example, ERC-777 contracts can notify other contracts when they receive tokens, opening doors to more complex scenarios.
Higher Gas Efficiency	ERC-777 is expected to be more gas-efficient compared to ERC-20, especially when performing certain operations such as batch operations.
Compatibility with ERC-20	It is possible to implement ERC-20 functionality on top of ERC-777 without losing the capabilities of the new standard.
Proxy Contract Capabilities	ERC-777 makes it easier to use proxy contracts, which can be useful for updating contracts and making changes without the need to reissue all tokens.

In general, ERC-777 offers more powerful tools for working with tokens on the Ethereum platform, making it an attractive choice for developers, especially when complex token logic or enhanced security in operations is required.

✓ In addition to this white paper on the Paradigma project, DGTLSubsoil invites you to take a survey and choose a leader among the company's three startups.

As a thank you for participating in the survey, there will be an AirDrop of Parad tokens waiting for you at the end of the form. 📄

Link to the survey and Airdrop

THANK YOU!
